NEW FULLY ADJUSTABLE IR ILLUMINATOR CAPTURES ASIS

Decatur, GA – (10/16/07) – “One model for all applications!” That was the exciting statement that ran rampant when addressing Videolarm’s new Fully Adjustable InfraRed Illuminator (IR200-36) at the 2007 ASIS International Conference and Tradeshow in Las Vegas.

So why all the commotion over an InfraRed(IR) Illuminator? Jimmy Pfaffenberger, Vice-President of Sales and Marketing of Videolarm, quickly explains, “Our new IR200-36 is an exciting new product that is future proof for your monitoring applications. The patent pending product incorporates a unique manually adjustable feature that enables the viewer to manipulate the IRs beam angle from 30°, 45° or 60° as well as the power setting for penetrating distances between 100 to 660 feet. So, now when your monitoring environment expands, so can your video surveillance system.”

IR illuminators are ideal for effective monitoring in insufficient light scenarios, i.e. night-time surveillance. Composed of multiple light emitting diodes (LEDs), the IR illuminator produces an infrared beam of light, which when paired with a day / night camera, will illuminate the surrounding area for increased visibility.

“Not only does the new IR200-36 expand to your environments monitoring needs, but the fully adjustable feature protects you from additional expenditures of purchasing a completely new IR to accommodate your growing application. Hence, one model for all applications.”

Constructed out of a lightweight, rugged, weather resistant housing, the IR200-36 includes a surge protection, automatic fan for heat dissipation and Videolarm’s impressive 5-year warranty. The new IR is currently available through local distribution channels.

About Videolarm, Inc.

Surveillance camera and accessory manufacturer, Videolarm, www.videolarm.com, developed the first outdoor dome enclosure in 1976. For the past 30+ years, they have been providing innovative surveillance solutions to Schools and Universities, Parking and Correctional facilities, Hospitals, Retail centers, Nuclear and Water Management plants through its international network of distributors, integrators, installers, and OEMs. The privately owned manufacturer is located in Decatur, GA, just east of Atlanta. Pricing and information are available online at www.videolarm.com or directly through Videolarm’s sales department at (800) 554-1124, from 8:00am to 5pm Eastern Time
