

## Videolarm Has Been a Major Player in School Security for Years

Atlanta city schools are beefing up security system wide, and Videolarm is in the thick of things once again. According to a story in *The Atlanta Journal Constitution*, the Atlanta School System spent \$3.3 million on high-tech surveillance equipment. Many of the cameras installed in each school (designed to cover exits and entrances) are provided by Videolarm

An ACH13 aluminum housing looks over students at Centennial Place Elementary in Atlanta, GA.

At Stoneview Elementary in Dekalb County, GA the RC200 ceiling mount is used for surveillance. The housing replaces a 2 x 2 ceiling tile, and can be manually rotated 360°.

But other systems around the country have been using cameras for years. Neighboring Dekalb County schools have made good use of Videolarm's ACH13 standard housing and our unique RC200 rotating housing for several years.

The introduction of the **Warrior Camera System** has been of particular interest to school boards and administrators because of their small size, and their vandal-resistant bodies. Warrior housings can be used in virtually any location, indoors or outdoors.

WS1 ceiling mount cameras are being used in a new parking garage on the Emory University campus outside Atlanta, GA. The cameras are tied in to Emory's LAN, allowing access to the video via the internet.

In Seattle, officials at Lincoln Elementary are using two WS7 housings outside to keep watch over the school grounds. A **PolEvator™** was also installed in front of the school to help with surveillance.

Recently the Cincinnati Public School System purchased the new **Warrior Pan/Tilt** to be placed in a new school. Officials had originally planned to use standard mini-domes but were impressed with the versatility and protection that the Warrior cameras offered.

The WP7 pan/tilt with optional WM7 wall mount

Our camera systems, housings, and accessories can be found on school grounds, in school buildings, and on college campuses across the country. At Videolarm, we continue to provide products to protect the lives of America's most important resource...her children.
